CAMERA COVER

The Laparoscopic Camera Cover Manufactured by Novin Sazan Salamat Pasargad is a transparent, single-use sheath designed to cover the probe or camera cable during laparoscopic surgeries. This cover prevents the transfer of contamination from non-sterile equipment to the sterile surgical field, ensuring patient safety and maintaining sterile conditions

MECHANISM OF ACTION

- Isolation: The cover completely encapsulates the camera and its cable, preventing direct contact with the surgical site
- Clear vision: The transparent, distortion-free material ensures maintained image quality.
- Microbial barrier: Prevents cross-contamination between patients and protects the surgical site from contamination by equipment.

Important Safety Notes

- Open the sterile package under controlled conditions.
- Insert the laparoscopic camera into the cover through the designated opening or from the end.
- Secure the cover using the provided adhesive strip or retaining ring (depending on the model).
- Ensure that the cable is fully covered to prevent any contact of equipment with the sterile field.

Key Features

- Disposable
- ISO 13485 certified
- Sterilized with ethylene oxide gas
- Includes spike, tube, connector, and 2 caps
- Approved by the Ministry of Health, Treatment, and Medical Education.
